Mixing Dough & Capacity Information

The moisture content of heavy dough is a critical factor when selecting proper mixing speed. You should never use 2nd speed when mixing heavy dough with an Absorption Ratio (AR) of 50% or less. To determine the Absorption Ratio (AR) of a product, divide the water weight by the flour weight.

Warehouses:
170 Millennium Blvd, Moncton, NB, E1E2G8
1605 Crescent Cr Carrollton, TX, Dallas, TX 75006

Example: Calculate the Absorption Ratio of a mixture containing 10 lbs. Of flour and 5 lbs. of water.

$$10 / 5 = 0.50 = 50 \% = \text{AR}$$

Capacity Conversion

- 1 Gallon of Water Weighs 8.33 lbs.
- 1 Liter of Water Weighs 1 kg or 2.2 lbs.
- 1 lb = 0.454 kg / 1 kg = 2.2 lbs.
- 1 US Liquid Quart = 0.946 Liters

Speeds:

- **1st Speed Only
- ***1st Speed & 2nd Speed Only

Notes:

- If using high gluten or rice flour, please reduce capacity by 10%.
- If using water colder than 70°F, ice or chilled flour, please reduce capacity by 10%.
- Attachment hub should not be used while mixing.
- Mixer should be powered off when changing speeds

Bakery & Pizza Equipment

Planetary Mixers vs Spiral Mixers

It is very important to fully review your needs when choosing a mixer, as choosing the wrong style or size can slow down the operation of your business. Each mixer has its pros and cons depending on the needs of your application. Here is a list of the main features and benefits of Planetary Mixers vs Spiral Mixers.

Planetary Mixers

All Purpose Mixer used for whipping, mixing or beating a wide variety of products.

Multiple Speed Settings to accommodate different ingredients - Eggs, Cake Batter, Potatoes, Dough, etc.

Size Options: Available in tabletop and floor models.

Bowl Size is measured by quarts. 7qt, 12qt, 20qt, 30qt, 40qt, 60qt, 80qt and 120qt.

Accessories: These units generally come with an attachment hub to add on accessories like meat grinders and vegetable attachments

Limitations: These mixers come with a compacity chart and if exceeding or constantly running at the compacity, they will have a much shorter life span.

Great for Restaurants, Bakeries, Cafes, Hotels and more.

Spiral Mixers

Dough Mixer, great for all kinds of varieties of dough. Pizza, Bagel, Bread, etc.

Mixer Size is generally by Flour or Dough weight.

2 Speed Setting, which is great for developing your dough.

First Speed helps bring the mix together into a consistent mass

Second Speed develops the gluten structure of the dough.

Accessories: These mixers come with a dough hook and attached bowl. Some models come with a removeable bowl.

Limitations: These mixers are only meant for dough and do not come with an accessory hub for attachments.

Great for Bakeries & Pizza Shops.

Cooking Equipment

Artisan Stone Deck Ovens

The BakeMax Electric Artisan Stone Deck Oven are European in design and performance. The ovens are designed for high volume baking, pizza, and all-purpose operations. Unique in both design and technology, our ovens are not only an excellent baking solution, but also offer a contemporary style serving as a centerpiece for today's high-end baking industry.

Its versatility makes it suitable for a wide range of products. This modular oven is suitable for any production capacity; the number of decks can be gradually increased as your business grows. Available in pan widths ranging from one through four pans wide and up to four decks high. Optional proofers and storage cabinets available on the one, two and three pan wide ovens.

**Deck Oven with Optional
Proofer**

Features:

- Heavy duty construction with stainless steel front exterior and high grade steel chamber. Fully insulated with rock wool to prevent heat loss and offer higher performance.
- Separate steel decks offer the ability to add or remove decks based on your business needs.
- Heavy duty legs with lockable castors.
- Adjustable doors with large tempered glass windows offer the ability to view products while cooking and to add a distinct selling point for customer.
- Power on-off rocker switch for each deck.
- Digital temperature controllers with temperature LED display and temperature-ready LED indicators.
- Sensitive K-type thermocouple sensors.
- Maximum temperature for baking 572°F
- Holds 18"x26" full size pans
- 99 minutes digital timers with LED display and continuous ring alarm controlled by rocker switches.
- Chamber oven light controlled by rocker switches.
- Moisture control dampers.
- Includes a stone hearth which produces a crispier bottom crust and more golden-brown color for food. The stone is cut into several separate decks to get rid of thermal expansion issue.
- Compartment Steam Generator - The compartment steam generator is installed above heating elements. The compartment absorbs recycle upward heat and generates strong steam while water is being injected into the compartment. The steam generator does not consume any extra electric power and ensures rapid recovery.
- Elements - Independent, operator controlled top & bottom heating elements provide an optimal heat distribution over the entire chamber. Offering optimal thermal condition of the chamber uniformly transfers the heat to the products. The bottom set of electric heating elements attaches to the underside of the hearth, and the top set attaches to the ceiling of the chamber. Top and bottom digital thermostats control each set of heating elements, allowing operators to determine the ratio of top vs. bottom heat and offer infinite possibilities to adjust the oven for the baking of every conceivable product.
- 1-year limited warranty
